1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3, 5, 6, 8, drawn to a high temperature article comprising a foraminate PGM layer.

Group II, claim(s) 2-4, 7, 9-15, drawn to a high temperature article comprising a fabric PGM structure.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature common to Group II that the foraminate layer is a fabric is not common to group 1. Further, fabrics formed from platinum wires or fibers were known in the art as evidenced by EP 0364153 and therefore, the special technical feature of Group II is not a contribution to the art.
